

## Fasteners

We have an enormous range of stock items, specialising in unusual, semi-standard and non-standard fasteners and it is impossible to list everything (at the present time). We can offer the fastest possible turnaround on breakdown items. Many items can be manufactured same-day if required. Our specialities are large diameter or special socket screws and bolts, made from our vast stocks of ready heat-treated blanks. Many of the special fasteners we produce are re-sold, so you may have already used us without knowing!

We also supply cold-formed, pressed or turned special parts. Materials include stainless steel, brass, nylon and aluminium. Standards and specials can also be supplied on scheduled basis, and all plated finishes can be catered for.
